CORTEZ, ANGELICA
CPE32S3

1. I searched how to use indexing to grab the one word given in the instruction using a nested list.
2. I google how to get the email website domain from a string.
3. I searched how to count the number of words that occur in a string.
4. I searched for the lambda expressions and how to filter out words from a list
5. I searched how to use the zip function and dict() to create a dictionary
6. I forgot the basics of Python and I will learn it now so that I can answer all the Hands On Activities in this course
7. I will practice later the introduction to python so that I can recall what my learnings on online classes about Python

Python Challenge - Colaboratory (google.com)
